

HEMBRA

HEMBRA

Is a multidisciplinary art studio, based in Monterrey Mexico, focused on works that revolve around painting, photography, sculpture and digital art, generally based on abstract expressionism one of the essential elements in her work are the textures, the forms, and the experimentation with materials, combining them in a way that generates their own language, the continuous dialogue between textures, materials and the need to express themselves intuitively is what motivates the creations of Hembra , poetic aesthetics and raw perceptions of reality and how it can be perceived in an abstract way, is one of the main purposes of her practice.

These ideas are communicated organically, trying to project a creative chain through all the projects. The imaginary can be related to the shapes of the sea, forms of outer space, or real life concepts of abstraction, taking into account the rawness that each work can project
